YOUR PLANS IN THE RIGHT HANDS

Anytime.

Anywhere.

Always.

In Case of Crisis
by RockDove Solutions

SOLUTION HIGHLIGHTS

Supported on Multiple Platforms and Supports Unlimited Users

The App is available and operates on the popular platforms. It is also scalable to support distribution to any size company or group.

Publish Multiple Plans That are Saved Locally to the Mobile Device

Have multiple plans you want to publish? Not a problem, the app can support multiple plans whether they are location or event based. It even works when there is no internet connection. The In Case of Crisis app is stored locally on a mobile device so it can be accessed at any time.

Custom Branding and Content

The In Case of Crisis app can be customized to look like your brand using your colors, graphics and most importantly, your plan.

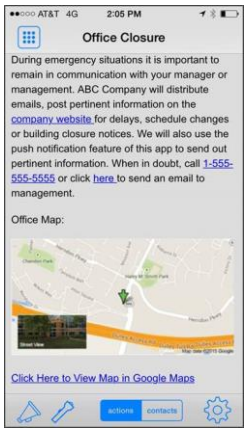
Make Your Plans Actionable

"One Tap" Icons & Banner

Use actionable banners and icons to make calls, reports and more with just one tap.

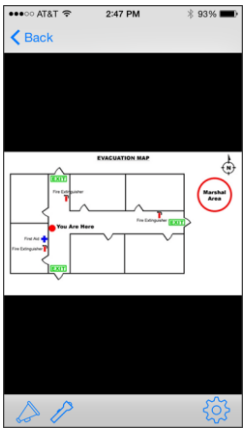
Create Checklists

Provide checklists and tables to guide your people on how to respond



Insert URL Links & Maps

Add URL links and maps to provide more location specific information and tap additional resources



Attach Diagrams & Pictures

Include evacuation diagrams, pictures and PDF documents

Embed RSS Feeds

Embed RSS feeds to get up to the minute information like weather alerts

---

Make Incident Reporting Easy

Give your people a simple way to report an incident, fill out a claim and much more. Now you can provide custom forms that include radio buttons, pull-down menus and pictures. When a form is submitted, it is sent to your designated contacts and a copy is archived online. You will even be able to see where a report was submitted from.

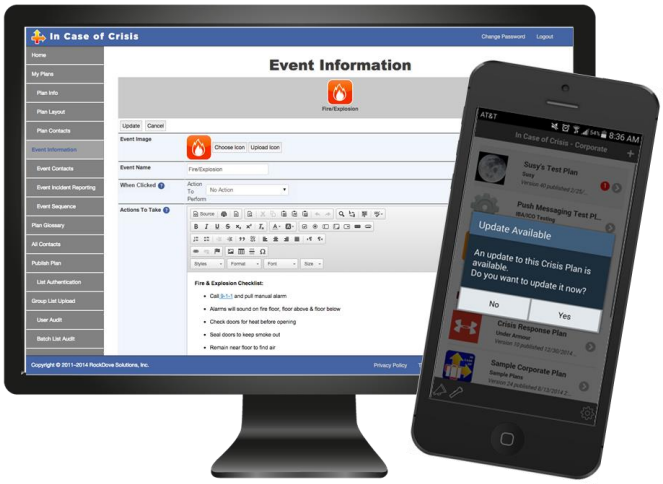
Communicate With Your People in Seconds

In Case of Crisis allows you to reach people in minutes… as often as you need to. You can even go right from an alert notification or email straight to your plan on the app. This offers your people instant guidance on how they should respond.

Control Who Sees What

From the Online Portal, you can decide who has access to each plan you publish and what type of security to use. The portal will auto update which employees should be assigned to what plan. If an employee leaves, their plan will be removed automatically.



Make Updates Instantly

Publishing your plan information is easy with the In Case of Crisis Online Portal whether you are adding, modifying or removing content. After any change has been made, they are automatically updated to your people.
